## 1. FEDERAL GUARANTEES—OUTLOOK

### 1.1. Introduction

The Federal Guarantees System is one of the cornerstones of the fiscal framework in Brazil. It is designed to ensure the fiscal equilibrium and to provide the legal enforcement upon public entities, federal and subnational ones, regarding their debt formation.

The Brazilian National Treasury is one of the main agents responsible for managing the fiscal policy, searching for efficiency and transparency. As such, it conducts the concession process of federal guarantees, also controlling and executing guarantees and its collaterals.

If any guaranteed credit event arises, the payment becomes an actual responsibility for the National Treasury (Public Debt Undersecretariat—DMO), just like any other debt issued by the federal government. Thus, the guaranteed debt is a contingent liability for the Treasury. After the guaranteed debt is paid by the federal government, the collateral agreements are triggered in order to recover the amount expended. As such, the Treasury monitors eventual delays from the original debtor perspective, establishing a period for them to remedy their situation, and warning them for the penalties and consequences set forth in the contract terms and in the legislation.

The description above justifies the roll of public debt managers, as far as official guarantees are similar to conventional debt instruments. They are contracts under the civil law, affect the financial position of the government, consume budgetary resources. Typically, contractual loans, associated to their guarantees, hold a cost-risk relationship very close to traditional debt instruments. Therefore, they must be treated as such in the funding strategy.

Hence, as in the Federal Debt Management, it matters to explore the guaranteed debt characteristics, as well as their costs and risks. In that sense, the new Federal Guarantees Report inaugurates a series of indicators that detail their composition regarding different currencies, indices (linkers), maturities, costs for all guaranteed entities. This was possible due to the construction of a special module on our Debt IT-System designed to encompass more than 500 contracts with different characteristics. With that, more transparency can be provided to this contingent liability, allowing analysts to derive new approaches to assess Federal Guarantees attached to loans, which is the object of this report (published every four months). They should be understood as a portfolio of obligations, with procedures and rules underlying its formation, besides cost-risk exercises.

## 1.2. Outstanding Guaranteed Debt

According to Article 29, IV, and Article 40 of the Brazilian Fiscal Responsibility Law (FRL), federal guarantees can be classified in two categories. The first and most common are the guarantees on credit loans, which correspond to the guarantees offered by the federal government towards government related entities (GRE), subnational governments, State owned enterprises (SOE) and controlled entities according to legal definitions. As for the origin, guarantees attached to credit loans can be classified as foreign or domestic, depending on the origin of the guaranteed debt.

By the end of Aug-18, the outstanding guaranteed debt amounted R\$ 270.38 bn. The domestic guaranteed debt reached R\$ 117.28 bn while the external guaranteed debt reached R\$ 153.10 bn.

All numbers published in this report, including the FX-rate used to compute the debt expressed in Brazilian reais (R\$), refer to August 31<sup>st</sup>, 2018.

The outstanding guaranteed debt may increase due to the following factors: disbursement of existing contracts; contracting new debt with disbursement; indexation of the domestic guaranteed debt; FX-rate depreciation. Conversely, amortizations and FX-rate appreciation may decrease the outstanding debt.

The table 1.1 below display the numbers as of 08/31/18.

**Table 1.1**  
Guaranteed Debt  
Profile

	(R\$ million)		
	Dec 2017	Apr 2018	Aug 2018

## 2. GUARANTEED DEBT PROFILE

### 2.1. Creditors

Domestic guaranteed debt represents 43.4% of the total. External guaranteed debt totalled 56.6%. Federal banks are responsible for 96.0% (R\$ 112.55 bn) of the domestic credit, while, in the case of the external credit, multilateral organisms respond for 86.2% (R\$ 132.05 bn).

**Table 2.1**  
Guaranteed Debt  
Profile by Creditor

Creditor Classes	Outstanding (R\$ million)	(%)
<b>Domestic Creditors</b>	<b>117,280.53</b>	<b>43.4</b>
Federal Banks	112,551.62	41.6
Private Banks	4,728.91	1.7
<b>Foreign Creditors</b>	<b>153,102.96</b>	<b>56.6</b>
Multilateral Organisms	132,049.28	48.8
Private Banks	12,377.36	4.6
Government Agencies	8,676.32	3.2
<b>Total</b>	<b>270,383.50</b>	<b>100.0</b>

Domestically, BB, BNDES and CAIXA, represent 17.8%, 16.1% and 7.5% out of the total, respectively. As for external creditors, IBRD (WB) and IADB are the most representative, with 23.9% and 22.3% respectively.

**Table 2.2**  
Guaranteed Debt  
Profile:  
Largest Creditors

Creditors	Outstanding (R\$ million)	(%)
<b>Domestic Creditors</b>	<b>117,280.53</b>	<b>43.4</b>
BB	48,148.78	17.8
BNDES	43,568.97	16.1
CAIXA	20,303.36	7.5
Other	5,259.43	1.9
<b>Foreign Creditors</b>	<b>153,102.96</b>	<b>56.6</b>
WB	64,559.64	23.9
IADB	60,264.77	22.3
CAF	5,492.63	2.0
Other	22,785.92	8.4
<b>Total</b>	<b>270,383.50</b>	<b>100.0</b>

## 2.2. Debtors

Regarding debtors, state governments are the most representative, with 77.0% (R\$ 208.19 bn) out of the total. Banks and municipalities represent 8.2% and 6.6% respectively. Federal SOE hold only 5.4% (R\$ 14.53 bn) and controlled entities, 2.9% (R\$ 7.84 bn).

**Table 2.3**  
Guaranteed Debt  
Profile by Debtor

Debtors	Outstanding (R\$ million)	(%)
States	208,189.79	77.0
Federal Banks	22,070.68	8.2
Municipalities	17,751.83	6.6
Federal SOE <sup>a</sup>	14,533.67	5.4

Profile by Debtor

### 2.2.1. States

The following table shows the largest guarantees attached to states, as well as its internal credit ratings, computed by the Treasury<sup>1</sup>. The largest debtor is Rio de Janeiro State, with 14.5% of all guaranteed loans, followed by São Paulo and Minas Gerais.

**Table 2.4**  
Guaranteed Debt  
Profile: Largest States

Debtors—States	CAPAG <sup>a</sup>	Outstanding (R\$ million)	(%)
Rio de Janeiro	D	39,325.34	14.5
São Paulo	B	33,528.63	12.4
Minas Gerais	-	24,939.92	9.2
Bahia	C	13,934.96	5.2
Santa Catarina	C	10,727.96	4.0
Rio Grande do Sul	D	10,525.93	3.9
Ceará	B	10,223.42	3.8
Other <sup>b</sup>		64,983.62	24.0
<b>Total</b>		<b>208,189.79</b>	<b>77.0</b>

<sup>a</sup> Internal credit ratings published by the National Treasury Subnational Government Undersecretariat. As these are based on preliminary data, the ratings may change over the period.

<sup>b</sup> Annex 2 shows these data for all 27 states.

**Graph 2.2**  
Guaranteed Debt  
Profile: Largest States

<sup>1</sup> The internal credit ratings (CAPAG) is an important assessment for any entity applying for a Treasury guarantee. It is computed based on the MoF Regulation n. 501, issued on 11/23/17. The inputs consider indicators to cover overall debt levels (not only guaranteed debt), current savings and liquidity. It ranks subnationals from A to D (lowest). According to the referred normative the applicant must have rating B or higher in order to be eligible to receive a federal guarantee, although there are other eligibility criteria.

### 2.2.2. Municipalities

The city of Rio de Janeiro holds R\$ 7.51 bn, equivalent to 2.8% of all guaranteed loans. Table 2.5 shows the top 5 cities.

**Table 2.5**  
Guaranteed Debt  
Profile:  
Largest Municipalities

Debtors—Municipalities	Outstanding (R\$ million)	(%)
Rio de Janeiro	7,508.97	2.8
Belo Horizonte	1,355.88	0.5
Fortaleza	1,043.85	0.4
Manaus	994.00	0.4
São Bernardo do Campo	847.06	0.3
Other	6,002.07	2.2
<b>Total</b>	<b>17,751.83</b>	<b>6.6</b>

**Graph 2.3**  
Guaranteed Debt  
Profile:  
Largest Municipalities

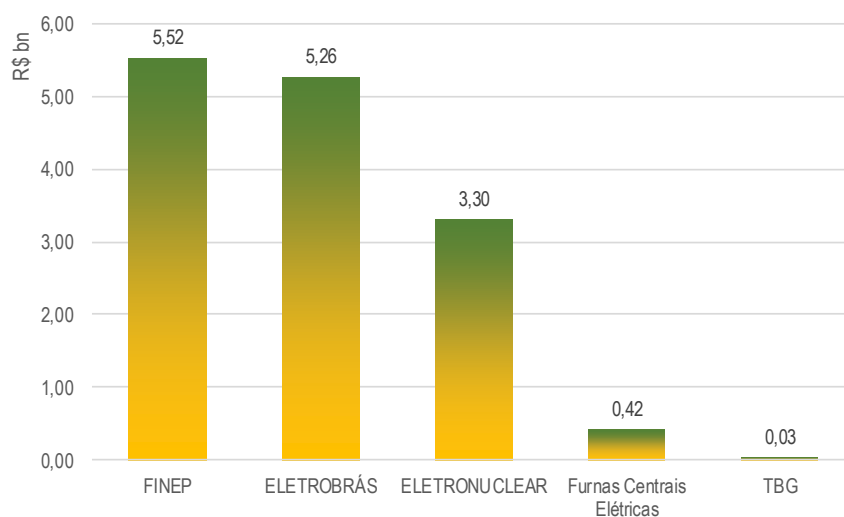

### 2.2.3. Federal State-Owned Enterprises (SOE)

Among SOE, FINEP responds for 2.0% (R\$ 5.52 bn) of the total debt guaranteed by the federal government, followed by Eletrobras, also with 1.9% (R\$ 5.26 bn).

**Table 2.6**  
Guaranteed Debt  
Profile: Largest SOE

Debtors—SOE	Outstanding (R\$ million)	(%)
FINEP	5,517.08	2.0
ELETROBRAS	5,261.10	1.9
ELETRONUCLEAR	3,304.86	1.2
Furnas Centrais Elétricas	421.44	0.2
TBG	29.19	0.0
<b>Total</b>	<b>14,533.67</b>	<b>5.4</b>

**Graph 2.4**  
Guaranteed Debt  
Profile: Largest SOE

### 2.2.4. Federal Banks

Federal Banks hold R\$ 22.07 bn in guaranteed debt. BNDES and CAIXA are on the top, with 5.6% (R\$ 15.08 bn) e 2.3% (R\$ 6.12 bn) of the total guaranteed amount, respectively.

**Table 2.7**  
Guaranteed Debt

Banco do Brasil	168.96	0.1
<b>Total</b>	<b>22,070.68</b>	<b>8.2</b>

**Graph 2.5**  
Guaranteed Debt  
Profile:  
Largest Fed. Banks

### 2.2.5. Controlled Entities

Controlled entities (subnational SOE, usually public utility companies) represent 2.9% (R\$ 7.84 bn) out of the total guaranteed debt. SABESP-SP and CEEE-D-RS are the most important with R\$ 5.02 bn and R\$ 0.85 bn, respectively.

**Table 2.8**  
Guaranteed Debt

CESP-SP	309.49	0.1
COPASA-MG	287.14	0.1
Other	831.36	0.3
<b>Total</b>	<b>7,837.53</b>	<b>2.9</b>

**Graph 2.6**  
Guaranteed Debt  
Profile: Largest  
Controlled Entities

## 2.3. Indices

There are two types of indices that affect the outstanding guaranteed debt. The first type affects the financial value of the principal throughout time. For external debt contracts, for instance, the original currency is factored in as the actual index, as the outstanding debt is expressed in Brazilian reals and, thus, dependent on the FX-rate.

The second type of indices affect the interest payments, determining the creditor pay-off by the interest accrued in each period until the payment date. E.g. most external debt contracts have interest rates linked to the LIBOR.

The table below shows the profile of the guaranteed debt according to the indices affecting the principal. The category “Non-indexed” refer to the debt whose principal nominal values are fixed and not corrected by any index over time.

**Table 2.9**  
Profile by Index

Indices Applied on Principal	Total Principal		Fixed-rate Interests		Variable-rate Interests	
	(R\$ million)	(%)	(R\$ million)	(%)	(R\$ million)	(%)
FX-rate	188,973.91	69.9	23,539.42	8.7	165,434.49	61.2
IPCA (inflation)	2,879.63	1.1	2,879.63	1.1	0.00	0.0
SELIC	1,396.11	0.5	1,396.11	0.5	0.00	0.0
TJLP <sup>a</sup>	55,072.99	20.4	0.00	0.0	55,072.99	20.4
TR	2,772.77	1.0	2,772.77	1.0	0.00	0.0
Non-indexed	19,288.10	7.1	5,478.75	2.0	13,809.35	5.1
<b>Total</b>	<b>270,383.50</b>	<b>100.0</b>	<b>36,066.67</b>	<b>13.3</b>	<b>234,316.82</b>	<b>86.7</b>

<sup>a</sup> Although TJLP (Long Term Interest Rate) is an interest rate, it is considered an index because some contracts have principal the linked to a 6% ceiling, with the exceeding value capitalized into the overall debt.

Both types of indices (over principal and interest rates) affect the risk analysis of the guaranteed debt. For example, the FX-linked exposure must include the contracts denominated in foreign currency and those denominated in BRL, but linked to the USD. On the other hand, the only kind of guaranteed debt where the debtor knows exactly what would be the future payments in advance is the non-indexed principal with fixed-rate interest, in this case, 2.0% of the total guaranteed debt. This example would be analogous to a fixed rate security outstanding in the market.

### 3. MATURITY PROFILE—GUARANTEED DEBT

An important risk indicator to be monitored by the guarantor (Treasury) is the percentage maturing in the next 12 months. From the Treasury perspective it is essential to understand what could arise and be prepared to deal with liquidity and budgetary issues in order to perform the payments when required. These measures allow debt managers to know the debt incoming flow for each period and how the guarantees are distributed over time.

As of August 31<sup>st</sup>, 2018, 8.5% of the guaranteed debt is maturing in the next 12 months. This number is broken-down according to the table below. It is important to note that all payments are considered in these percentages, including accrued interest. Hence the numbers displayed in the table are higher than the overall outstanding debt we have considered so far.

**Table 3.1**  
Maturity Profile

Debtors	Up to 12 mo.		1 to 2 years		2 to 3 years		3 to 4 years		4 to 5 years		More than 5 yr.	
	(R\$ bn)	(%)	(R\$ bn)	(%)	(R\$ bn)	(%)	(R\$ bn)	(%)	(R\$ bn)	(%)	(R\$ bn)	(%)
States	22.07	7.5	22.44	7.6	26.06	8.8	21.96	7.5	20.79	7.1	181.30	61.5
Municipalities	2.08	8.9	2.01	8.6	1.92	8.2	1.84	7.9	1.79	7.7	13.68	58.7
Federal Banks	3.50	12.5	2.99	10.7	2.64	9.4	2.65	9.5	2.43	8.7	13.75	49.2
Federal SOE	3.03	15.7	3.04	15.8	3.06	15.8	2.64	13.7	1.46	7.6	6.05	31.4
Controlled Entities	1.06	11.1	0.86	9.0	0.70	7.3	0.68	7.1	0.66	6.9	5.60	58.6
<b>Total</b>	<b>31.74</b>	<b>8.5</b>	<b>31.35</b>	<b>8.4</b>	<b>34.38</b>	<b>9.2</b>	<b>29.78</b>	<b>7.9</b>	<b>27.14</b>	<b>7.2</b>	<b>220.38</b>	<b>58.8</b>

## 4. AVERAGE TERM TO MATURITY (ATM) OF THE GUARANTEED DEBT

For cross-country comparisons, the Brazilian National Treasury calculated the average life of the federal public debt using the ATM methodology. This indicator considers the average life of each loan, weighted by the respective amortizations.

The ATM of the guaranteed debt reached 8.04 years, as detailed in the table below. The table opens by the credit origin, as well as by debtor class.

Table 4.1  
ATM

Debtors	Outstanding (R\$ million)	ATM (years)
<b>Total</b>	<b>270,383.50</b>	<b>8.04</b>
<b>Domestic Guarantees</b>	<b>117,280.53</b>	<b>7.61</b>
States	93,653.68	8.21
Municipalities	3,784.47	5.59
Federal Banks	6,216.61	5.82
Federal SOE	13,316.28	4.99
Controlled Entities	309.49	0.63
<b>Foreign Guarantees</b>	<b>153,102.96</b>	<b>8.36</b>
States	114,536.11	8.68
Municipalities	13,967.36	8.54
Federal Banks	15,854.07	6.43
Federal SOE	1,217.39	5.04
Controlled Entities	7,528.03	7.73

## 5. STATISTICS OF EXECUTED GUARANTEES

The Brazilian National Treasury constantly monitors financial events related to the contracts guaranteed by the federal government, warning debtors about the need to fulfill their obligations and about the sanctions, penalties and other consequences of defaulting, according to the contracts and binding legislation. If the original debtor does not meet its obligations, the Treasury steps in as the guarantor and liquidates the obligations with the original creditor on the original debtor's behalf. While executing the guarantee, the Treasury triggers the collateral according to contractual terms, which include, besides the financial expenditure associated to the guarantee, fines, fees, interest, and other expenses as described in the contractual clauses.

In 2017, the Treasury intervened and paid R\$ 4.06 bn of debts originally under the responsibility of states and municipalities. As of August 31<sup>st</sup>, 2018, R\$ 2.83 bn has already been paid, as detailed in the table below:

	(R\$ million)			
Debtor	2016	2017	Jan-Apr 2018	May-Aug 2018
<b>States</b>	<b>2,361.86</b>	<b>4,031.31</b>	<b>757.42</b>	<b>2,056.64</b>
Rio de Janeiro	2,227.32	3,989.42	743.51	1,431.50
Minas Gerais	0.00	0.00	0.00	553.15
Piauí	0.00	0.00	0.00	55.49
Roraima	27.42	41.89	13.91	16.50
Mato Grosso	107.13	0.00	0.00	0.00
<b>Municipalities</b>	<b>15.81</b>	<b>28.49</b>	<b>8.75</b>	<b>2.18</b>
Natal - RN	10.92	28.49	8.75	2.18
Chapeco - SC	2.27	0.00	0.00	0.00
Cachoeirinha - RS	1.45	0.00	0.00	0.00
Belford Roxo - RJ	1.17	0.00	0.00	0.00
<b>Total Paid</b>	<b>2,377.67</b>	<b>4,059.80</b>	<b>766.17</b>	<b>2,058.83</b>

Article 13, topics I and II, of the MoF Regulation n. 501, issued on 11/23/17, establishes penalties for the debtors that do not fulfill their original obligations. Hence, the following are not entitled to contract new guaranteed debt until the end of the freezing period, displayed in the table below:

Debtor	End of Freezing Period
Minas Gerais State	08/08/2019
Piauí State	07/23/2019
Roraima State	08/08/2019
Municipality of Natal - RN	05/23/2019

Debtor	End of Freezing Period
Amapá State	11/15/2018
Goiás State	02/15/2019
Rio Grande do Norte State	02/15/2019
Roraima State	01/16/2019
Munic. of Belford Roxo - RJ	10/15/2018
Munic. of Chapeco - SC	12/10/2018

The State of Rio de Janeiro, though fit to be included in the penalties above, is entitled to contract new guaranteed debt, by the terms of art. 11, § 1, of Complementary Law n. 159, issued on May 19<sup>th</sup>, 2017, which defines the Fiscal Recovery Regime (FRR) for states and the Federal District.

**Table 5.1**  
Guarantees  
Executed

**Table 5.2**  
Freezing due to not  
performing loans:  
art. 13, I

**Table 5.3**  
Freezing due to  
delays: art. 13, II

## 6. FISCAL RECOVERY REGIME (FRR)

Complementary Law n. 159, issued on May 19<sup>th</sup>, 2017, disciplined the fiscal recovery plan for states under fiscal disarray. By the terms of that law, a set of measures must be taken by the states to adjust their fiscal side. These include privatization of local SOE's, social security reform, reduction of tax benefits, reduction of payroll, and so on.

Besides that, under the FRR, the Treasury will concede the extraordinary waiver of the debt held by the government (as the creditor) for up to 36 months. In case of an extension of the FRR, the payments will restart progressively and linearly until it reaches the full values of the debt by the end of the FRR regime.

Also, while the FRR is prevailing, the state is entitled to apply for new guaranteed debt if the loans are directed to restructure debt with the financial system, to finance the reduction in the payroll, to build IT systems for payroll control, to finance arrears and other finalities described in the same law and recovery plan.

Finally, if the state defaults under the FRR, the Treasury is impaired to recover the collaterals embedded in the contracts. Eventual guarantees executed by the Treasury will be monitored and accounted for and capitalized according to the original financial conditions, and the total amount will be charged against the FRR beneficiary when the period is due.

It is important to highlight that the obligations resulting from the FRR had been included in the National Treasury funding needs since the 2018 Annual Borrowing Plan<sup>2</sup>.

More details on the FRR are available at <http://www.tesouro.fazenda.gov.br/rrf>.

### 6.1. State of Rio de Janeiro (RJ)

Since the state of RJ entered the FRR, as of September 5<sup>th</sup>, 2017, the Treasury, as a guarantor, has been liquidating the guaranteed States' debt with the financial system. Nonetheless, it has been prevented to immediately recover the values in conformity with the collateral agreements. As mentioned above, the values are being controlled and will be recovered in the future as defined by the FRR law. As it follows, this report will shed some light on the guaranteed debt of the participants of the FRR, represented by the state of RJ so far.

Note that, for a complete assessment of the state of RJ and a more comprehensive risk analysis, one must consider the full indebtedness level of the entity<sup>3</sup>. Its total debt is composed by the debt with the Treasury, the non-guaranteed debt with the financial system and the guaranteed debt, the latter one being the object of this report.

---

### 6.1.1. Guaranteed Debt Profile

The state of RJ guaranteed debt reached R\$ 39.33 bn, about 14.54% of total guaranteed debt. This is broken-down in foreign and domestic debt, as in Table 6.1. The table also shows the domestic debt linked to FX-rate.

**Table 6.1**  
RJ — Guaranteed  
Debt Profile

(R\$ million)	
	Aug 2018
<b>Domestic Guarantees</b>	<b>24,945.48</b>
FX-linked	12,285.67
Other	12,659.80
<b>Foreign Guarantees</b>	<b>14,379.87</b>
<b>Total</b>	<b>39,325.34</b>

### 6.1.2. Profile by Creditor

Table 6.2 shows the guaranteed debt profile of Rio de Janeiro according to its creditors.

**Table 6.2**  
RJ — Guaranteed  
Debt Profile  
by Creditor

Creditors	Outstandig (R\$ million)	(%)
<b>Domestic Guarantees</b>	<b>24,945.48</b>	<b>63.4</b>
BB	11,764.99	29.9
BNDES	6,899.21	17.5
BNP	3,169.96	8.1

<sup>a</sup> This column considers installments due after August 31<sup>st</sup>, 2018.

### 6.1.5. Total Maturity of the State of RJ's Guaranteed Debt

The full maturity of the State of RJ's guaranteed debt is displayed in the graph 6.1. The values include principal and interest estimated as of August 31<sup>st</sup>, 2018, until July 2043, when the last installment is currently contracted with the entity.

**Graph 6.1**  
RJ- Total Maturity  
up to 2043

That 2020 peak is caused by the maturity of a loan signed between the State of RJ and BNP Paribas, as much as R\$ 2.9 bn. This is a bullet contract, which means that there is a single payment of interest and principal in the maturity date—December 2020.

## GLOSSARY

**Amortization** — Part of the installment referred to the debt principal, which leads to diminishing the outstanding debt.

**Creditor** — Financial Institution which funded some project.

**Contracted Value** — Value defined in the contract to execute a specific project. It does not necessarily affect the outstanding Debt at once, as it depends on the pace of the disbursement.

**Controlled Entities** — Public Companies or Entities controlled by the overseeing State.

**Credit Operations** — Contract signed by which the creditor funds the debtor's project, and the guarantor backs-up the debt. The debtor is then obliged to amortize the values with time and interest agreed upon.

**Debtor** — Entity beneficiary of the credit and underlying guarantee to execute the project according to contractual terms.

**Disbursement** — Financial outlay from the creditor to the debtor to execute the project.

**Domestic Guarantees** — Guarantees associated to Credit Operations or Funds originally funded domestically, regardless from the currency or index set in the contract.

**Foreign Guarantees** — Guarantees associated to loans originally funded by foreign creditors.

**Government Agencies** — Type of Creditor defined by international public entities. The main ones are AFD, JICA and KfW.

**Guarantor** — Entity responsible to fulfill a guarantee in case of a credit event. In this report, the Brazilian National Treasury.

**Multilateral Organisms** — Type of Creditor defined by international entities. The main ones are IBRD (World Bank), IADB.

**Outstanding Guaranteed Debt** — Total disbursed netted out from the amortized Debt.

### Acronyms:

**AFD** - Agence Française de Développement (French Development Agency)
